Higher interest costs dynamics was connected with the increase of the deposits volume and improvement of the Bank's competitive position related to deposits' interest.
- Net fees and commissions income amounted to PLN 1,218 million and was 23.1% lower compared to the corresponding period of 2004; income amounted to PLN 1,538 million and was 17.4% lower compared to the previous year, and expenses amounted to PLN 320 million and were 14.8% higher. The decrease in fees and commissions income mainly resulted from the recognition of income on loans and advances using the effective interest rate method;

- The result from financial instruments at fair value amounted to PLN (-)12 million and was PLN 34 million higher compared to the previous year. The increase was due to, among others, the assignment of a significant part of the debt securities portfolio into the ALPL portfolio starting from 1 January 2005. This assignment was performed in order to increase the transparency of the results from the valuation of debt securities and to recognize the results from the valuation of hedging and hedged instruments in the same category of the profit and loss account.
- The result from investment securities amounted to PLN 288 million and was PLN 309 million higher compared to the previous year. The increase of the result was due to an increase in the activities of the Group's holding company on the WSE, especially in the 3rd quarter of 2005, associated with good market conditions in that period;
- Foreign exchange result amounted to PLN 612 million and was 29.3% higher compared to the year 2004, mainly due to better results on swap points from FX SWAP and CIRS transactions (the result from these transactions is of an interest type). Those transactions are used to secure the currency liquidity resulting amongst others from the mortgage loans denominated in foreign currencies.
- Net other operating income amounted to PLN 691 million, i.e. 152.9% increase; and consisted of operating income amounting to PLN 874 million and operating costs amounting to PLN 183 million. The increase in net other operating income resulted from consolidation of Wilanów Investment Sp. z o.o., which belongs the PKO Inwestycje Group, and from the increase in the income of the consolidated entity - Fort Mokotów Sp. z o.o. (which also belongs to the PKO Inwestycje Group) due to the development of its activities.

The impairment losses in 2005 amounted to PLN (-)86 million and were 83 million lower compared to the year 2004. The above result was mainly impacted by an improvement of credit portfolio quality and sale of non-performing retail loan portfolio in the 4th quarter of 2005 and subsequent release of the provisions created for the above portfolio.

During the year 2005, the overhead costs of the Group amounted to PLN 4,145 million and were 5.1% higher compared to the previous year. In the same period, the overhead costs of PKO BP SA decreased by 0.2%. The increase in the overhead costs of the Group was due to the above-mentioned consolidation of Wilanów Investments Sp. z o.o., as well as an increase in the development-related costs of Fort Mokotów Sp. z o.o. The increase in administrative expenses of these companies was compensated by the increase in their income presented under "Other operating income".

The following performance indicators were calculated based on the financial results of the PKO BP SA Group in 2005:

Ratio	2005	2004

2. Net profit (loss)/ average assets (ROA _{net})	1.98%	n/a
3. Gross profit (loss)/ average equity (ROE ⁵ _{gross})	24.79%	n/a

9.1.4 Shareholders' equity

As at 31 December 2005, the shareholders' equity of the PKO BP SA Group amounted to PLN 8,832 million and was PLN 26 million i.e. 0.3% lower compared to the end of 2004. The decrease in shareholders' equity compared to the balance as at 31 December 2004, despite the relatively high result for the current period resulted from many factors; the most important of which were the appropriation of PLN 1 billion from the 2004 profit to dividends, adjustments resulting from IAS 39 implementation and a decrease of the revaluation fund (see commentary regarding the capital adequacy ratio).

³ ROA gross and ROA net computed as proportion of gross and net profit (loss) for the 12 month period to the arithmetic average of assets at the beginning and at the end of the period, respectively.

⁴ ROA and ROE for the year 2004 can not be computed as comparable to the year 2005 because of lack of data about assets and equity on 31.12.2003 according to IFRS.

⁵ ROE gross and ROE net computed as proportion of gross and net profit (loss) for the 12 month period to the arithmetic average of equity (including retained earnings and profit for the year) at the beginning and at the end of the period, respectively.

The capital adequacy ratio as at 31 December 2005 amounted to 14.07% and decreased by 4.37 p.p. in comparison to the end of 2004. The decrease was mainly caused by:

- the decrease of own funds used to calculate the capital adequacy ratio – mainly due to decrease of the revaluation reserve (due to sale of the shares from the investment portfolio and transfer of the result from the revaluation reserve to the profit and loss account),
- the increase of the capital requirement, due to increase of the loan portfolio.

In the year 2005, total income in the profit and loss account amounted to PLN 5,767 million and was PLN 190 million i.e. 3.4% higher compared to the year 2004. Out of this total amount:

- PLN 3,517 million referred to net interest income, which was PLN 46 million i.e. 1.3% higher compared to the corresponding period of 2004. The balance of net interest income comprised of interest income amounting to PLN 5,560 million and interest expenses amounting to PLN 2,042 million, which were 6.0% and 15.2% higher compared to the corresponding period of 2004, respectively. Higher dynamics of the interest costs was connected with the increase of the deposits volume and improvement of the Bank's competitive position related to deposits' interest;
- PLN 1,170 million referred to net fees and commission income, which was 26% lower compared to corresponding period of 2004. This balance comprised of fees and commission income amounting to PLN 1,503 million (which was 19.4% lower than in 2004), and costs amounted to PLN 333 million (which was 17.1% higher than in 2004). The decrease in fees and commission income mainly resulted from the recognition of income on loans and advances using the effective interest rate method – if comparable data would be used, the fee and commission income dynamics would amount to approximately 111%;
- PLN 275 million referred to the result from financial instruments at fair value through profit or loss and result from investment securities, which was PLN 342 million higher compared to the previous year (this item is discussed in the section on the results of the PKO BP SA Group),
- PLN 614 million referred to foreign exchange result which was 41.1% higher compared to the year 2004. The increase was mainly due to achieving better results (on SWAP points) from FX SWAP and CIRS transactions (the result from these transactions is an interest-type result),
- PLN 162 million referred to the net result on other operating income and expenses, which represented a 21.4% increase. It comprised of other operating income amounting to PLN 259 million and other operating expenses amounting to PLN 96 million.

The impairment losses for the year 2005 amounted to PLN (-) 54 million and were PLN 80 million lower compared to the year 2004. The above result was mainly impacted by an improvement of credit portfolio quality and sale of non-performing retail loan portfolio in the 4th quarter of 2005 and subsequent release of the provisions created for the above portfolio.

In the year 2005, the Bank's overhead costs amounted to PLN 3,637 million and were 0.2% lower compared to the corresponding period of 2004.

9.3. FACTORS AFFECTING FINANCIAL PERFORMANCE OF PKO BP SA IN 2005

9.3.1 Macroeconomic factors

- In the 4th quarter of 2005, growth in industry production and retail sales increased compared to the previous quarter, and the positive trends in the construction and building industry continued. These indicate continuing economic revival in the 4th quarter of 2005;

⁶ ROA gross computed as proportion of gross profit (loss) for the 12 month period to the arithmetic average of assets at the beginning and at the end of the period, respectively.

⁷ ROA and ROE for the year 2004 can not be computed in similar as for the year 2005 because of lack of data about assets and equity on 31.12.2003 according to IFRS .

⁸ ROE gross computed as proportion of net profit (loss) for the 12 month period to the arithmetic average of equity (including profits brought forward and profit for the year) at the beginning and at the end of the period, respectively..

- In the last quarter of 2005 a slight seasonal increase of unemployment rate to the level of 17.6% in December was noted. At the same time, the number of workers employed in enterprises increased;
- At the end of 4th quarter of 2005 a decrease was noted of the inflation rate, to the level of 0.7% as compared to 1.8% year to year in the end of 3rd quarter 2005. The decrease in the inflation rate was mainly due to a decrease in fuel prices on the world markets, as well as an decrease in food prices as a result of suspension of export to Russia since November;
- Annualized upward trend in households' deposits slowed down and at the end of December and amounted to 3.5% comparing to 4.5% at the end of September. The slowdown resulted from the higher benchmark, because the monthly increases were similar to the ones recorded in the previous quarter. The increase in household's deposits was supported by the increase of real income of households in the 4th quarter. In the 4th quarter corporate deposits' rapid increase slowed down and at the end of December, the corporate deposits increased by 16.8% y/y comparing to 21.5% y/y at the end of September 2005;
- The demand for bank loans continued to grow, the y/y acceleration of credits to households increased propelled by very high demand on mortgage loans. In addition, there was a small increase in corporate loans as well;
- Between October and December the Monetary Policy Council did not change the monetary policy parameters, reference rate of Polish Central Bank remained at the level of 4.5%.

9.3.2 Regulatory factors

In the 4th quarter of 2005 a new factor influenced business operations of PKO BP SA Group – Acts forming the new capital market law i.e.: on capital market supervision, on financial instruments trading, on public offering and conditions of financial instruments introduction on organized trading system and on public companies, which were introduced on 24 October 2005 together with accompanying regulations. These Acts create conditions for future liberalization of the capital market and increase of competitiveness, among others by creating possibilities of concluding transactions with securities by brokers without intermediation of Warsaw Stock Exchange, increased rights of KPWiG (Securities and Exchange Commission) to protect rights of investors, changed obligations of issuers of securities traded on the Warsaw Stock Exchange concerning information, extended possibilities to set up the brokerage activities, resolution of tax issues in umbrella investments funds, which should accelerate their development. Despite the fact that the new regulations entered into force in the 4th quarter of 2005, they will have the main effect on PKO BP SA Group business operations in the future.

The Group's activities in the 4th quarter of 2005 were also affected by:

- obligatory to the banks operating in Ukraine regulations concerning creation of specific provisions by 1 October 2005,
- preparation for implementation of New Capital Accord (Basel II).

9.3.3 Financial markets

- In the 4th quarter of 2005, the profitability of treasury bonds increased by 23 basis points (one year treasury bonds) and by 38 basis points (long-term bonds). The increase in profitability was a result of rising uncertainty about future political situation after September parliamentary and October presidential elections, after which the governmental coalition enjoying parliamentary majority, expected by the investors was not created. Additionally, the depreciation of Polish debt securities was caused by decreasing investors' expectations as to decrease of interest rates by RPP (Monetary Policy Council).
- In the 4th quarter of 2005, the Polish Zloty appreciated in relation to Euro by almost 1.5% (to 3.86 PLN/EUR at the end of December) and depreciated by 0.1% in relation to US Dollar (to 3.26 PLN/USD at the end of December). The depreciation of PLN in relation to USD was on one hand a result of appreciation of USD on international markets and on the other hand a result of temporary political uncertainty caused by the results of parliamentary elections in Poland. Since the beginning of November an upward trend of zloty's value has began and lasted till the end of the year. The appreciation was supported by the Ministry of Finance which run transactions of buying zloty with the money coming from issuing bonds in foreign currencies as well as market's expectations for another transactions of such kind in the future.

23. SEGMENTATION OF ACTIVITIES OF THE PKO BP SA GROUP

The primary segmentation key is based on business type (business segments) and the secondary - on geographical area (geographical segments).

The Group usually settles inter-segment transactions as if they were concluded between unrelated parties, using internal settlement rates.

Business segments

Segmentation by business is as follows:

- Corporate Segment includes transactions of the holding company with large corporate clients (in 2004 it included small and medium sized enterprises as well),
- Retail Segment includes transactions of the holding company with private individuals and, starting from 2005, also small and medium sized enterprises,
- Treasury Segment includes inter-bank transactions, transactions made using derivative instruments and debt securities,
- Investments Segment includes brokerage and investing activities of the holding company,
- Housing Segment includes transactions of the holding company connected with granting housing loans and accepting housing deposits.

The Bank has not identified any other segments as a result of not having reached the thresholds set forth in IAS 14, which are as follows:

- segment revenue from sales to external customers and from transactions with other segments amounts to 10% or more of the total external and internal revenue of all segments, or,
- segment result, whether profit or loss, amounts to 10% or more of the aggregated result of all segments in profit or loss, whichever greater in absolute value, or,
- segment assets amounts to 10% or more of total assets of all segments.

According to IAS 14, segments which were not separated have been disclosed as unallocated reconciling items.

The assets and liabilities of a given segment represent operating assets and liabilities used by that segment in its operating activities.

The financial data for the period of 12 months ended 31 December 2004 are not fully comparable due to the use by the Group of the following exemptions allowed under IFRS 1, related mainly to the use of effective interest rate and calculation of impairment write-downs.

Segmentation by geographical region

Taking into account the fact that the Group's activity is also conducted outside Poland, segmentation by geographical region is a secondary reporting format.

The operating activities of the PKO BP SA Group, which cover all business segments, are concentrated on the activities in Poland through Bank PKO BP SA and related entities.

Except for Poland, the Group carries out its activities in Ukraine – through KREDOBANK S.A.

The scope of activities of the Group outside Poland is smaller compared to the result of the whole Group.

The tables below present data relating to revenues, expenditures and certain types of the assets of the individual geographical segments for the 12-month periods ended 31 December 2005 and 31 December 2004.
