

iPKO biznes – changes in login procedure valid from 17th of November, 2017

Changes in the login procedure to the new iPKO biznes service

Since 17th of November, 2017 the changes on the <u>www.ipkobiznes.pl</u> website will be introduced. The changes result from _new features implemented to new iPKO biznes service page view.

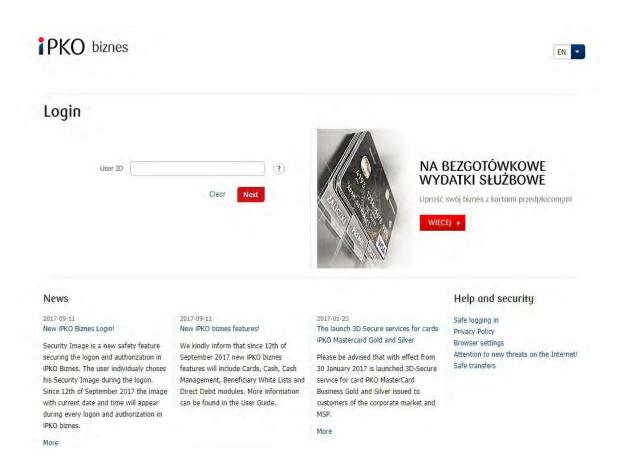

Additional information concerning the new iPKO biznes and the new login procedure can be found at the websites listed below:

www.pkobp.pl/noweipkobiznes and https://www.pkobp.pl/bankowosc-elektroniczna/nowe-ipkobiznes/

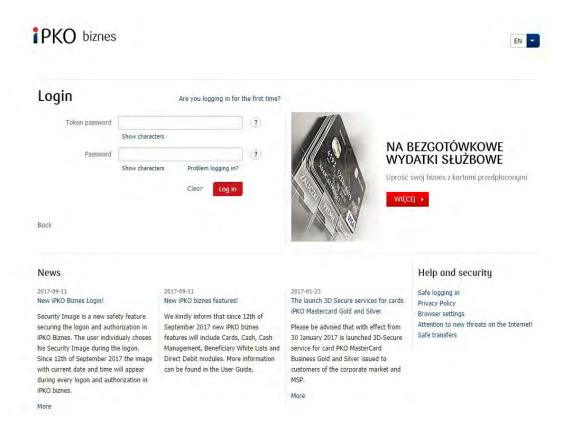

The new login site is used for both new and the previous service version. During the logon the procedure of service recognizes the User and displays the corresponding service version. New two step login procedure is introduced (please find the detailed description below).

The new screen and login procedure will be presented as follows:

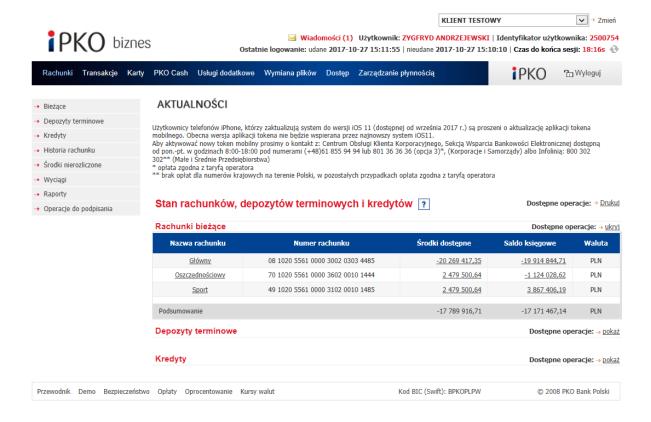

1. Key in the User ID at the address www.ipkobiznes.pl/nowe. The screen will contain only one required field, that is User ID. Key in the User ID and press Next button.

2. After keying in the correct User ID – the User will be taken to the next screen of the login procedure. After keying in the data to the Token Password and Password text fields press Log in.

After the login procedure is finished the User will be taken to the corresponding iPKO biznes service version. In case of owning the few contexts the User can freely switch between them.

4. The Security Image will be displayed during the login procedure only to the Users that had been migrated to the new iPKO biznes service. The Security Image is attribute to the user's Costumer Number.

From the day of exchange the login screen the iPKO biznes service will be supported for the following browsers (for the mentioned and newer versions): Firefox 20+; Chrome 27+; Opera 11.6+; IE 8+.

It means that from the moment of exchange the login screen the access to the previous and new version of the iPKO biznes service will not be possible for the older browsers mentioned above.

Important! If You find the appearance of the login website suspicious, BEFORE LOGGING IN, the User should immediately cease the action and contact:
