In the first three quarters of 2005, the aggregated income items of the PKO BP SA Group amounted to PLN 4,863 million and were PLN 546 million i.e. 12.7% higher compared to the respective period of 2004:

- Net interest income amounted to PLN 2,681 million and was PLN 60 million, i.e. 2.3% higher compared to the first three quarters of 2004; this consisted of interest income amounting to PLN 4,296 million and interest expenses amounting to PLN 1,615 million, i.e. 10.6% and 27.9% higher compared to the corresponding period of the previous year, respectively. Higher interest costs dynamics was connected with the increase of the deposits volume considering the limited ability to decrease their percentage.
- Net fees and commissions income amounted to PLN 896 million and was 21.6% lower compared to the corresponding period of 2004; income amounted to PLN 1,124 million and was 15.7% lower compared to the previous year, and expenses amounted to PLN 228 million and were 18.9% higher. The decrease in fees and commissions income mainly resulted from the recognition of income on loans and advances using the effective interest rate method;
- The result from financial instruments at fair value amounted to PLN 104 million and was PLN 90 million higher compared to the previous year. The increase was due to, among others, the assignment of a significant

part of the debt securities portfolio into the ALPL portfolio starting from 1 January 2005. This assignment was performed in order to increase the transparency of the results from the valuation of debt securities and to recognize the results from the valuation of hedging and hedged instruments in the same category of the profit and loss account. The negative result amounting to 36 million in the 3<sup>rd</sup> quarter of 2005 resulted from an increase of the negative adjustment of the prior year results (associated with a derecognition of the restricted interest) and the negative result on the ALPL portfolio. The decrease of the result on ALPL portfolio was caused by the stabilization of the long end of the yield curve and the move of the positive result on the valuation of interests on the fixed-rate government bonds (dominating in the ALPL portfolio) with the use of the effective interest rate methodology to the interest result

- The result from investment securities amounted to PLN 258 million and was PLN 295 million higher compared to the previous year, out of which PLN 204 million were realized in the 3<sup>rd</sup> quarter of 2005. The increase of the result in the 3<sup>rd</sup> quarter of 2005 was due to an increase in the activities of the Group's holding company on the WSE associated with good market conditions in that period;
- Foreign exchange result amounted to PLN 475 million and was 60.2% higher compared to the respective period of 2004, mainly due to better results on swap points from FX SWAP and CIRS transactions (the result from these transactions is of an interest type). Those transactions are used to secure the Bank foreign currency liquidity and are connected with the mortgage loans denominated in foreign currencies.
- Net other operating income amounted to PLN 434 million, i.e. 155.8% increase; and consisted of operating income amounting to PLN 554 million and operating costs amounting to PLN 120 million. The increase in net other operating income resulted from consolidation of Wilanów Investment Sp. z o.o., which belongs the PKO Inwestycje Group, and from the increase in the income of the consolidated entity - Fort Mokotów Sp. z o.o. (which also belongs to the PKO Inwestycje Group) due to the development of its activities.

The impairment losses for the first three quarters of 2005 amounted to PLN 141 million. The difference of the impairment losses after three quarters of 2005 in comparison to three quarters of 2004 resulted from a change of the Decree of the Minister of Finance of 10 December 2003 on creation of the provisions for risks related to banking activities), which resulted in a decrease of the financial result charges due to specific provisions by approx. PLN 86 million.

During the period from January to September of 2005, the overhead costs of the Group amounted to PLN 3,008 million and were 7.0% higher compared to the previous year. In the same period, the overhead costs of PKO BP SA decreased by 0.3%. The increase in the overhead costs of the Group was due to the above-mentioned consolidation of Wilanów Investments Sp. z o.o., as well an increase in the development-related costs of Fort Mokotów Sp. z o.o. The increase in administrative expenses of these companies was compensated by the increase in their income presented under "Other operating income".

#### 9.1.4. Shareholders' equity

As at 30 September 2005, the shareholders' equity of the PKO BP SA Group amounted to PLN 8,458 million and was PLN 400 million i.e. 4.5% lower compared to the end of 2004. The decrease in shareholders' equity compared to the balance as at 31 December 2004 was the effect of the appropriation of PLN 1 billion from the 2004 profit to dividends.

expenses amounting to PLN 236 million (i.e. 20.2% higher compared to the previous year). The decrease in the fees and commission income mainly resulted from the recognition of income on loans and advances using the effective interest rate method;

- PLN 361 million referred to the result from financial instruments at fair value through profit or loss and result from investment securities, which was PLN 386 million higher compared to the previous year (this item is discussed in the section on the results of the PKO BP Group),
- PLN 480 million referred to foreign exchange result which was 66.9% higher compared to the first three quarters of 2004. The increase was mainly due to achieving better results (on SWAP points) from FX SWAP and CIRS transactions (the result from these transactions is an interest-type result),

PLN 86 million.

In the period from January to September 2005, the Bank's overhead costs amounted to PLN 2,659 million and were 0.3% lower compared to the corresponding period of 2004.

#### **9.2.1. Macroeconomic factors**

In the 3<sup>rd</sup> quarter of 2005:

- the growth in industry production and retail sales increased compared to the previous quarter, and the positive trends in the construction and building industry continued. These indicate gradual increase in the growth of PKB in the 3<sup>rd</sup> quarter of 2005 in comparison to the 2<sup>nd</sup> quarter;
- a slight positive effect of economy growth, seasonal factors and of the inflow of the EU funds was recorded. This resulted in a decrease in the unemployment rate, which amounted to 17.8% at the end of August 2005. At the same time, the number of persons employed in enterprises increased;
- an increase was noted in the inflation rate, to the level of 1.8% in September, as compared to 1.4% year to year in June 2005. The increase in the inflation rate was due to supply factors, i.e. a significant increase in fuel prices (16.5% year to year in September 2005) due to increasing energy prices on the world markets, as well as an increase in food prices in comparison to the corresponding period of the previous year;
- a growing trend was recorded in household deposits, which increased by 4.6% year to year at the end of September 2005. The increase was caused, among others, by the increase – in real terms - in the level of salaries in enterprises and additional payments to part of pensioners. At the same time, there was an increase in the growth in corporate deposits in the 3<sup>rd</sup> quarter of 2005, which was most probably due to an overall improvement in the financial results of enterprises and the continued small size of investments;
- the demand for bank loans continued to grow, propelled by further decreases of interest rates by the Monetary Policy Council and gradual improvement in macroeconomic conditions. In the period under review, the annual growth in household loans was continued, mainly due to a high demand for housing loans. In addition, there was a small increase in corporate loans as well;
- the Monetary Policy Council decreased interest rates twice, in July and August, by 0.25 p.p., and decreased the bills of exchange rediscount rate by 0.5 p.p. in August. The Board continued to apply soft monetary policy during that period. The Board believed that, due to lower economic growth (including lower demand for capital expenditures) compared to NBP's projections and rapid structural changes in the Polish economy (increased employment flexibility, growing international competition), the probability that the inflation rate would be below the target was relatively high, which encouraged the Board to apply softer monetary policy;

#### **9.2.2. Regulatory factors**

The following regulatory changes affected the Group's activities in the 3<sup>rd</sup> quarter of 2005:

- New requirements for banks, effective from 30 June 2005, for provision of information to NBP and GINB for the purpose of establishing the monetary policy and State monetary standing as well as the financial standing of banks and banking risks;

*Translation of interim financial statements of  
the PKO Bank Polski SA Group for the first three quarters of 2005  
The only binding version is the originally issued Polish version of this report*

- Amendments to the Personal Income Tax Act, effective from 1 July 2005, setting reporting requirements for banks in connection with taxation of interest income on savings held by non-residents and requirements relating to identification of such persons;
- Significant specific changes in tax proceedings, effective from 1 September 2005, resulting from the Amended Tax Ordinance Act, including changes in PKO BP SA's rights to issue guarantees and suretyships provided by taxpayers as a security for performing tax obligations.

In addition, the condition of the PKO BP SA Group was also affected by new and amended supervisory regulations for banks operating in Ukraine, relating, among others, to liquidity risk, currency risk and mandatory provisions.

### **9.2.3. Financial markets**

- In the 3<sup>rd</sup> quarter of 2005, there were increased fluctuations in the prices of treasury securities on the financial market. At the end of the quarter, the yields on the short end of the yield curve were app. 30 base points lower, and the yields on the long end of the curve – app. 5 base points higher than at the beginning of the quarter. The decrease in yields was mainly due to the decisions taken by the Monetary Policy Council, while the increase on the long end of the yield curve resulted from falling prices of bonds on world markets and decreasing expectations regarding the overall level of decreases in interest rates by the Monetary Policy Council.
- In the 3<sup>rd</sup> quarter of 2005, the Polish Zloty appreciated in relation to US Dollar by app. 2.7% and by app. 3.1% in relation to Euro. The following factors had a favourable effect on the Polish Zloty: sale of shares of PGNiG SA on the stock exchange (with a significant demand from foreign investors), increase in the demand for Central European currencies, as well as optimistic expectations of the investors regarding political situation after elections. Both on the market of treasury instruments and exchange rates, the effect of Parliamentary and Presidential elections were relatively small.

## **18. RESULTS OF CHANGES IN THE GROUP'S STRUCTURE, INCLUDING THE EFFECTS OF MERGER, TAKEOVER OR SALE OF THE GROUP'S ENTITIES, LONG-TERM INVESTMENTS, DIVISION, RESTRUCTURING AND DISCONTINUANCE OF ACTIVITIES**

The results of changes in the company's structure, including the result of merger, takeover or sale of Group entities, have been described in paragraph 6.2 of this commentary.

## **19. FACTORS WHICH MAY AFFECT FUTURE FINANCIAL PERFORMANCE WITHIN AT LEAST THE NEXT QUARTER**

In the next quarters of the year, the results of the PKO BP SA Group will be affected by economic processes which will take place in the Polish and global economy, as well as by reactions of financial markets to those processes.

The policy concerning interest rates applied by the Monetary Policy Council, as well as by other large central banks and increased volatility of interest rates and f/x rates on the financial markets noted in the fourth quarter of the year will be of great importance to the Bank's future results.

Additionally, the activities of the Group in the next reporting periods will be affected by the following three regulatory changes regarding capital markets coming into effect on 24 October 2005:

- on capital market supervision,
- on trading in financial instruments, public offers and conditions for introduction of financial instruments to regulated markets,
- on public companies.

The above regulations create environment for further liberalization of capital markets and increase in competition, among others due to enabling transactions in securities by brokerage houses without the participation of WSE, increase of SEC authorizations regarding protection of investors, new information requirements of WSE securities issuers, greater possibilities for conducting brokerage activities, and clarification of tax issues in *umbrella* type funds which should propel their development.

## **20. SURETYSHIPS AND GUARANTEES GRANTED BY THE ISSUER OR BY ITS SUBSIDIARY TO A SINGLE ENTITY OR ITS SUBSIDIARY, IF THE TOTAL VALUE OF GRANTED SURETYSHIPS OR GUARANTEES AMOUNTS TO AT LEAST 10% OF THE ISSUER'S SHAREHOLDERS' EQUITY**

During the 3<sup>rd</sup> quarter of 2005, PKO BP SA and its subsidiaries did not grant any suretyships or guarantees to a single entity or its subsidiary with the total amount of at least 10% of PKO BP SA's shareholders' equity.

## **21. PROCEEDINGS PENDING BEFORE A COURT, ARBITRATION TRIBUNAL OR PUBLIC ADMINISTRATIVE AUTHORITY**

As at 30 September 2005, the total value of court proceedings against PKO BP SA amounted to PLN 414,191,881.11, while the total value of proceedings initiated by the Bank amounted to PLN 93,291,385.38.

### **23. SEGMENTATION OF ACTIVITIES OF THE PKO BP SA GROUP**

The primary segmentation key is based on business type (business segments) and the secondary - on geographical area (geographical segments).

The Group usually settles inter-segment transactions as if they were concluded between unrelated parties, using internal settlement rates.

#### **Business segments**

Segmentation by business is as follows:

- Corporate Segment includes transactions of the holding company with large corporate clients (in 2004 it included small and medium sized enterprises as well),
- Retail Segment includes transactions of the holding company with private individuals and, starting from 2005, also small and medium sized enterprises,
- Treasury Segment includes inter-bank transactions, transactions made using derivative instruments and debt securities,
- Investments Segment includes brokerage and investing activities of the holding company,
- Housing Segment includes transactions of the holding company connected with granting housing loans and accepting housing deposits.

The Bank has not identified any other segments as a result of not having reached the thresholds set forth in IAS 14, which are as follows:

- segment revenue from sales to external customers and from transactions with other segments account for 10% or more of the total external and internal revenue of all segments, or,
- segment result, whether profit or loss, accounts for 10% or more of the aggregated result of all segments in profit or loss, whichever greater in absolute value, or,
- segment assets account for 10% or more of total assets of all segments.

According to IAS 14, segments which were not separated have been disclosed as unallocated reconciling items.

The assets and liabilities of a given segment represent operating assets and liabilities used by that segment in its operating activities.

The financial data for the period of 9 months ended 30 September 2004 are not fully comparable due to the use by the Group of the following exemptions allowed under IFRS 1, related mainly to the use of effective interest rate and calculation of impairment write-downs.

Except for Poland, the Group carries out its activities in Ukraine – through Kredyt Bank (Ukraina) S.A.
