CAPITAL ADEQUACY AND OTHER INFORMATION OF THE POWSZECHNA KASA OSZCZĘDNOŚCI BANK POLSKI SPÓŁKA AKCYJNA GROUP SUBJECT TO DISCLOSURE AS AT 31 MARCH 2022 (IN PLN MILLION)

1. Introduction

The Report "Capital Adequacy and Other Information of the Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna Group Subject to Disclosure as at 31 March 2022", hereinafter referred to as the "Report", was prepared in accordance with Article 111a of the Act of 29 August 1997 – the Banking Law1, hereinafter referred to as the "Banking Law", Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms, hereinafter referred to as the "CRR", and the Regulation (EU) 2019/876 of the European Parliament and of the Council of 20 May 2019 amending the CRR, taking into account the implementing acts under the CRR.

The disclosures also reflect the requirements set out in Commission Implementing Regulation (EU) No 2021/637 of 15 March 2021 laying down implementing technical standards with regard to public disclosures by institutions of the information referred to in Titles II and III of Part Eight of Regulation (EU) No 575/2013 of the European Parliament and of the Council (hereinafter referred to as the "Regulation 2021/637") and in the guidelines EBA/GL/2020/12 amending the guidelines EBA/GL/2018/01 of 4 August 2017 on uniform disclosures under Article 473a of Regulation (EU) No 575/2013 on the transitional period for mitigating the impact of the introduction of IFRS 9 on own funds to ensure compliance with the CRR "quick fix" in response to the COVID-19 pandemic.

Pursuant to Article 13(1) and Article 433a(1)(b) of the CRR, Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna hereinafter referred to as "PKO Bank Polski S.A." or the "Bank", being an EU parent institution and, within the meaning of Article 433a, a large institution, discloses the information regarding capital adequacy referred to in Part Eight of the CRR semi-annually, quarterly, in a separate document.

This Report has been prepared in accordance with the Bank's internal regulations concerning the information policy of PKO Bank Polski S.A. regarding capital adequacy and other information subject to disclosure (hereinafter: "The information policy of PKO Bank Polski S.A.), which is available on the Bank's website (www.pkobp.pl).

Unless otherwise stated, the figures presented in the Report are expressed in PLN million. Any differences in totals and percentages result from rounding amounts off to PLN million and rounding percentages off to one place after the decimal point.

The Report has been prepared taking into account all data available as at 31 March 2022. The Report addresses the requirements of the regulations described above insofar as they relate to the Bank and the Bank's Group. The lack of reference to a particular article means that the related disclosures are not applicable. This Report was subject to an internal verification by the Bank's Internal Audit Department.

Pursuant to the CRR, prudential consolidation is used for capital adequacy purposes, which, unlike consolidation in compliance with International Financial Reporting Standards, covers only subsidiaries which meet the definition of an institution, a financial institution or an ancillary services undertaking.

2. Own funds

For capital adequacy purposes, own funds are calculated in accordance with the provisions of the Banking Law, Part Two of the CRR and the implementing acts under the CRR.

The own funds of the Bank's Group include Common Equity Tier 1 capital and Tier 2 capital. No elements of Additional Tier 1 capital are identified in the Bank's Group.

3. Own funds requirements and risk-weighted exposure amounts

Pursuant to the CRR, the Group calculates own funds requirements for the following types of risk:

- 1) credit risk under the standardized approach (pursuant to Part III, Title II, Chapter 2 of the CRR);
- 2) operational risk:
 - a) under the AMA approach in respect of the Bank's operations, including the operations of the foreign branch in Germany¹ and the foreign branch in the Czech Republic;²
 - b) under the BIA (pursuant to Part III, Title III of the CRR) in respect of the operations of the foreign branch in Slovakia and in respect of the operations of the entities in the Bank's Group, subject to prudential consolidation;
- 3) market risk (pursuant to Part III, Title IV, Chapters 2-4 of the CRR);
 - a) foreign exchange risk calculated under the basic approach;
 - b) commodities risk calculated under the simplified approach;
 - c) equity instrument risk calculated under the simplified approach;
 - d) specific debt instrument risk calculated under the basic approach;
 - e) general debt instrument risk calculated under the duration-based approach;
 - f) other risks other than delta risk (non-delta risk) calculated under the scenario approach for options for which the Bank uses its own valuation models, and under the delta plus approach for other options.
- 4) other risks:
 - a) settlement/delivery risk calculated under the approach specified in Title V, Part III of the CRR;
 - b) counterparty credit risk, including the exposures to the central counterparty calculated under the standard method specified in Chapter 6, Title II. Part III of the CRR;
 - c) credit valuation adjustment risk (CVA) calculated under the approach specified in Title VI, Part III of the CRR;
 - d) exceeding large exposures limit calculated under the approach set out in Part IV of the CRR.

The total own funds requirement for the Bank's Group is the sum of the aforementioned own funds requirements for individual types or risk.

In calculating the own funds requirement for counterparty credit risk, the Bank uses contractual netting pursuant to the CRR (Articles 295-298).

¹ As from 1 January 2019, the Bank introduced an extended AMA to cover the Branch in Germany in accordance with the criteria that are being developed for the allocation of the own funds requirement for operational risk under the AMA for the Branch in Germany.

² As from 1 January 2021, the Bank introduced an extended AMA to cover the Branch in the Czech Republic in accordance with the criteria that are being developed for the allocation of the own funds requirement for operational risk under the AMA for the Branch in the Czech Republic.

28	Not applicable	N/A	N/A	N/A
29	Total	224 487	226 166	17 959

^{*} EU-19a presents the own funds requirement for securitisation exposures on the non-trading book with deductions from own funds in accordance with Chapter 5 of Title II of Part Three CRR. The amount of the requirement reduces the own funds of the Bank, therefore it does not generate exposure to Risk (RWA - risk weighted assets) with a risk-weight of 1250%

4. Liquidity risk, including financing risk

4.1. Introduction

Liquidity risk is the risk of the inability to settle liabilities as they become due because of the absence of liquid assets. The lack of liquidity may be due to an inappropriate structure of the balance sheet, a mismatch of cash flows, non-payment by counterparties, a sudden withdrawal of funds by customers or other market developments.

The purpose of liquidity risk management is to ensure the necessary level of funds needed to settle current and future liabilities (also potential ones), taking into account the nature of the activities conducted and the needs which may arise due to changes in the market environment, by appropriately shaping the structure of the balance sheet and off-balance sheet liabilities.

Detailed information on the process and organization of liquidity risk management, its identification, measurement, monitoring and reporting, as well as the management actions relating to liquidity risk is presented in the Financial Statements and in the Report entitled Capital adequacy and other information of the Powszechna Kasa Oszczędności Bank Polski Spółka Akcyjna Group subject to disclosure as at 31 December 2021. The solutions in this respect have not changed significantly in relation to those described as at the end of the year.

CAPITAL ADEQUACY AND OTHER INFORMATION OF THE POWSZECHNA KASA OSZCZĘDNOŚCI BANK POLSKI SPÓŁKA AKCYJNA GROUP SUBJECT TO DISCLOSURE AS AT 31 MARCH 2022 (IN PLN MILLION)

4.3. Oualitative information

A liquidity coverage ratio (LCR) is determined individually by each entity in the Bank's Group which is required to determine this ratio and on a consolidated basis for the Bank's Group as a whole.

As at 31 March 2022, the LCR of the PKO BP Group of approx. 143.6% has remained at a high level, significantly above the supervisory limit and internal limits and thresholds. Compared with 31 December 2021, the ratio fell by approx. 49.7 pps, mainly due to an increase in the mandatory reserve rate required by the NBP, an increase in the cost of selling corporate and municipal bonds included in liquid assets, a decrease in retail and corporate deposits, an increase in financial deposits, an increase in loans and lease receivables and an increase in the proceeds from derivative instruments. The Group's liquid assets decreased by approx. PLN 5 billion in that period, mainly as a result of the lower valuation of liquid securities.

The Bank maintains a high and safe level of high quality unencumbered liquid assets which constitute a hedge in the event that extreme liquidity scenarios (a liquidity surplus) materialize. Easily disposable assets include: cash (less the minimum balance maintained at the ATMs and in the Bank's branches), funds in the Bank's nostro accounts (excluding the average level of the mandatory reserve), interbank deposits placed with other banks and liquid securities.

As at the end of March 2022, the outflows in respect of derivative instruments calculated in accordance with the CRR amounted to approx. PLN 2.8 billion, whereas the impact of the unfavourable market conditions scenario on derivative instruments, financing transactions and other agreements accounted for approx. 1.1% of the total unweighted outflows recognized in the liquidity coverage ratio.

As at the end of March 2022, the Bank's Group had 2 currencies for which the ratio of the value of liabilities in a given currency to the total value of liabilities in all currencies amounted to at least 5%: PLN and EUR. The Bank's Group had an LCR above 100% for all currencies in total and for PLN.

The structure of the Bank's sources of financing was described in the Bank's annual financial statements as at and for the year ended 31 December 2021 (Note 71. Liquidity risk management). The Bank follows a strategy which consists of using the stable part of the deposit base as the basic source of financing in all currencies. Issues of bonds denominated in EUR, PLN and USD as well as mortgage covered bonds denominated in EUR and PLN also constitute a significant part of financing for the Bank and the Bank's Group (especially in the case of foreign currencies). Surplus funds obtained on the market in a given currency (issues of securities) are used to manage the Bank's foreign currency liquidity needs, using derivative transactions (mainly CIRS and FX swaps).

Impact of transitional arrangements on capital adequacy

The PKO Bank Polski S.A. Group applies the following transitional solutions in the calculation of own funds:

- transitional adjustment to minimize the impact of implementing IFRS 9 on own funds, in accordance with Article 473 a of the CRR;
- provisional treatment of unrealized gains and losses on securities measured at fair value through OCI in connection with the COVID-19 pandemic (according to Art. 468 of the CRR).

5.1. Transitional adjustment to minimize the impact of implementing IFRS 9 on own funds

On 1 January 2018, IFRS 9 "Financial Instruments", which replaced IAS 39 "Financial Instruments", entered into force. Changes were made to the classification and measurement of financial instruments, recognition and calculation of their impairment, and hedge accounting.

The impact of the implementation of IFRS 9 on own funds and capital adequacy measures is governed in Regulation 2017/2395³ of the European Parliament and of the Council. According to this regulation, banks may apply transitional provisions as regards own funds and increase Common Equity Tier 1 capital related to the implementation of the new impairment model over the next 5 years as from 1 January 2018, with a scaling factor decreasing from period to period.

Moreover, on 27 June 2020 Regulation 2020/873⁴ of the European Parliament and of the Council entered into force. This provision allows to mitigate the impact on the write-offs recorded as of 1 January 2020 on Tier 1 capital. Such arrangement may be used until 2024 inclusive, with the scaling factor assigned to this value decreasing from period to period.

The Bank decided that in the light of Art. 473a (7a) of the CRR implemented by the aforesaid Regulation, it would apply an option according to which the adjustment mitigating the impact of the introduction of IFRS 9 on own funds would receive a risk weight equal to 100% and the resulting value would be added to the total exposure.

The Bank's Group decided to apply the transitional provisions in full and to spread the impact of the adjustments for the implementation of IFRS 9 on own funds and capital adequacy measures over time.

5.2. Provisional treatment of unrealized gains and losses on securities measured at fair value through OCI

According to Article 468 of the CRR (as amended by the aforementioned Regulation 2020/873), banks may apply the provisional treatment of unrealized gains and losses measured at fair value through other comprehensive income in connection with the COVID-19 pandemic. This approach enables excluding from the calculation of the Bank's common equity position the portion of the unrealized gains and losses accumulated from 31 December 2019 included in the balance sheet under "changes in fair value of debt instruments measured at fair value through OCI", corresponding to exposures to central governments, regional governments or local authorities, and to public sector entities, excluding those financial assets that are impaired due to credit risk. The Bank's Group has decided to apply the above provisional treatment from December 2021 data onwards and has notified the Polish Financial Supervision Authority about its decision.

³ Regulation (EU) 2017/2395 of the European Parliament and of the Council of 12 December 2017 amending Regulation (EU) No 575/2013 as regards transitional arrangements for mitigating the impact of the introduction of IFRS 9 on own funds and for the large exposures treatment of certain public sector exposures denominated in the domestic currency of any Member State.

⁴ Regulation 2020/873 of the European Parliament and of the Council of 24 June 2020 amending Regulations (EU) No 575/2013 and (EU) 2019/876 as regards certain adjustments in response to the COVID-19 pandemic.
